Practical Requirements of the Arab Pharmacovigilance Guidelines

Practical guidance on how to comply with the pharmacovigilance requirements in the Middle East

Format:
Bespoke training

CPD:
12 hours for your records (depending on your requirements)

Certificate of completion

Course overview

On 1 July 2015, the Common Arab Guidelines on Good Vigilance Practices came into effect, marking a significant transformation in pharmacovigilance across the region. Closely aligned with key aspects of the June 2012 EU guidelines, these regulations introduced a new era of standards, expectations, and regulatory oversight.

This intensive two-day course brings these guidelines to life, exploring each topic through a practical, real-world lens. Designed with a strong focus on compliance with Regulatory Authority requirements, the programme goes beyond theory to examine how the guidelines are applied in practice. Participants will gain valuable insights drawn from inspection and audit experiences following implementation, with a clear focus on the areas most frequently highlighted in inspection findings.

Benefits of attending

- **Gain** a clear overview of the modules and the responsibilities of the Marketing Authorisation Holder (MAH)
- **Explore** the practical application of the modules and the required documentation
- **Discover** how to implement Quality Management Systems (QMS) across the company
- **Understand** regulatory expectations during inspections
- **Identify** the written processes that need to be in place

Who should attend

This course is designed for professionals involved in pharmacovigilance and regulatory activities across the Middle East and Arab States. It is also valuable for organisations looking to expand into this region.

Relevant roles include:

- Pharmacovigilance case processing specialists
- Local QPPVs
- Medical directors
- Drug safety managers
- QA auditors
- PSUR writers
- Company managers
- Licence holders

Reviews

★★★★★

Very talented and experienced expert who has answers to all PV queries that you can think of. Advanced training that goes through the modules of PV in depth explaining what is between the lines of the guidelines, and illustrating by real life examples.
