An Overview of Ethical Standards in Clinical Research Publication

This course will look at ethical research, responsible authorship, and data integrity while addressing conflicts, misconduct, and copyright issues.

Format:
Bespoke training

CPD:
1.5 hours for your records (depending on your requirements)

Certificate of completion

Overview

Good Publication Practice (GPP) ensures ethical research dissemination and integrity. Guidelines from various entities have evolved, shaping responsible authorship and publication. Key roles include authors, contributors, reviewers, editors, publishers, and owners, each with defined responsibilities. Ethical concerns like conflicts of interest, scientific misconduct, and copyright issues must be addressed. Medical journal publishing involves managing corrections, version control, preprints, and clinical trial data sharing. Protecting research integrity requires preventing data manipulation, ensuring patient privacy, and engaging patients in research. The role of AI tools in publication is also increasingly significant.

Benefits of attending

- **Understand** Good Publication Practice (GPP) guidelines
- **Adhere** to ethical and transparent dissemination of research findings

Who should attend?

- Clinical research professionals, including clinical research associates, investigators, and study coordinators
- Medical writers, regulatory writers, and publication professionals
- Quality assurance specialists and compliance officers in pharmaceutical and clinical research organisations
- Anyone involved in clinical trial documentation, regulatory submissions, or scientific publications seeking to improve their understanding of good practices and ethical guidelines

Run this programme in-house for your whole team

Coming to IPI Academy for your in-house training provides an all-inclusive service which gives you access to a wide variety of content, learning platforms and delivery mechanisms as well as your own personal training adviser who will work with you from the initial enquiry through to feedback and follow-up after the programme.

With over 600 trainers, all practitioners and experts across a huge range of fields, we can provide the training you need, where you need it, when you need it, and at a price which suits your budget. Our approach to tailored learning and development consists of designing and delivering the appropriate solution for each client.

For your FREE consultation and to find out more about how we can work with you to solve your training needs, please contact our training advisers:
